HG-966 USER MANUAL

Hygger Auto Aquarium Gravel Cleaner

Hygger Aquarium Auto Gravel Cleaner is a versatile tool to clean gravel and change water. It's never been easier to clean hidden detritus in the sand or floating in the water column. Ideal for gravel cleaning and water changing, it helps you provide best environment for your aquatic life.

Please read this user manual carefully before using and follow strictly in accordance with the manual.

1. PRODUCT FEATURES

Multi-function : This gravel cleaner can be used for water changes, sand washing and detritus absorption. It uses a multi-connection faucet adaptor to connect directly to your faucet, thereby eliminating spills and lifting heavy buckets.

Prevent blocking Design: Our gravel cleaner comes with a built-in internal filter screen that effectively blocks gravel from being suctioned out of the aquarium while still removing harmful detritus.

Control water flow: Waterflow control valve can be used for adjusting water flow.

Long outlet hose design: We have 25 feet, 33 feet and 50 feet long suction hose to meet the need of varied distance from faucet to aquarium.

Easy to assemble and use: Quick assembly within one minute.

2. ATTACHMENT INSTRUCTIONS:

- ①. Multi-connection faucet adaptor (6 inch)
- ②. Hose (25FT/33FT/50FT)
- ③. Waterflow control valve (6 inch)
- ④. Gravel tube (13 inch)
- ⑤. Detritus Vacuum (3 inch)

Multi-connection faucet adaptor dimension

3. INSTALLATION:

1. TO VACUUM: Attach waterflow assembly to faucet using the included faucet adaptor.

2. Close the gravel tube valve.

3. Submerge gravel tube in aquarium water.

4. Open water flow assembly valve, then turn on faucet.

5. Open gravel tube valve to begin vacuuming. If sand enters the gravel tube, adjust valve on the gravel tube to reduce the water flow.

6. To remove debris: at gravel-free aquarium, you can use a debris vacuum to suck out detritus/fish wastes.
