

## 5.METHOD OF APPLICATION

Please install the filter according to the following

- ①. Open the package and rinse all parts with clean water from tank (Don't rub) , in order to remove the any debris or dust and clean the filter. Then soak the sponges in tank water for 10 minutes.  
(Attention: For the single S, remove the air pipe side sponge , its used for replacing)
- ②. Fix the whole filter as above diagram.
- ③. Place the filter on the back wall of the aquarium with suction cups.
- ④. Connect the filter to air pump with an air tube, equipped with a check valve on the air tube to prevent flow-back of water during power failure.

**Make sure all the connection is firm! Then turn on the air pump.**

## 6.TIPS:

- a. This sponge filter must be connected with applicable size of air pump.
- b. Don't use tap water or hot water to clean the sponge filter. Make sure to clean the filter with tank water.
- c. Please equip a check valve on the air tube to prevent flow-back during power failure.
- e. Clean the filter with tank water every 2 ~ 4 weeks.
- f. We recommend replacing the sponge every 2 ~ 3 months.

## 7.WARRANTY

1. 1-year free warranty.
2. 1-month free return.
3. Free replacement for 3 months.
