

HG210 USER MANUAL

hygger Aqua Water Clarifier

hygger Aqua Water Clarifier. Safe, non-toxic, and fish-friendly. It effectively clarifies aquarium water by destabilizing, aggregating, and flocculating fine suspended particles and colloidal ions through mechanisms such as adsorption and charge neutralization, adsorption bridging, and double-layer compression. The resulting particles are then easily removed by filtration, eliminating turbidity and achieving crystal-clear water.

Usage Instructions:

1. Shake well before use.
2. Add 10 mL per 100 L of aquarium water. Double the dosage as needed for particularly turbid water or new aquarium setups.
3. Ensure the filter is running continuously during treatment.
4. Turn on the air pump to enhance aeration and prevent oxygen depletion after use.

Note:

1. Do not use Aqua Water Clarifier with other products, which may reduce their effectiveness.
2. Store unused liquid in its original container in a cool, dry place. Refrigeration or freezing is not required.
